User-Story:

Im März wurde von Swissmedic ein neues Medikament zugelassen mit der Indikation :

«ELAHERE als Monotherapie ist indiziert zur Behandlung von erwachsenen Patientinnen mit Folatrezeptor-alpha (FR α)-positivem, Platinresistentem, high-grade serösem epitheliale Ovarial-, Tuben- oder primärem Peritonealkarzinom, die zuvor ein bis drei systemische Behandlungslinien erhalten haben»

Nun muss sich Dimoth klar machen, welche anderen Produkte für die «gleiche» Indikation bereits vorhanden sind.

Rückblick

1. Iteration

exploratives Projekt

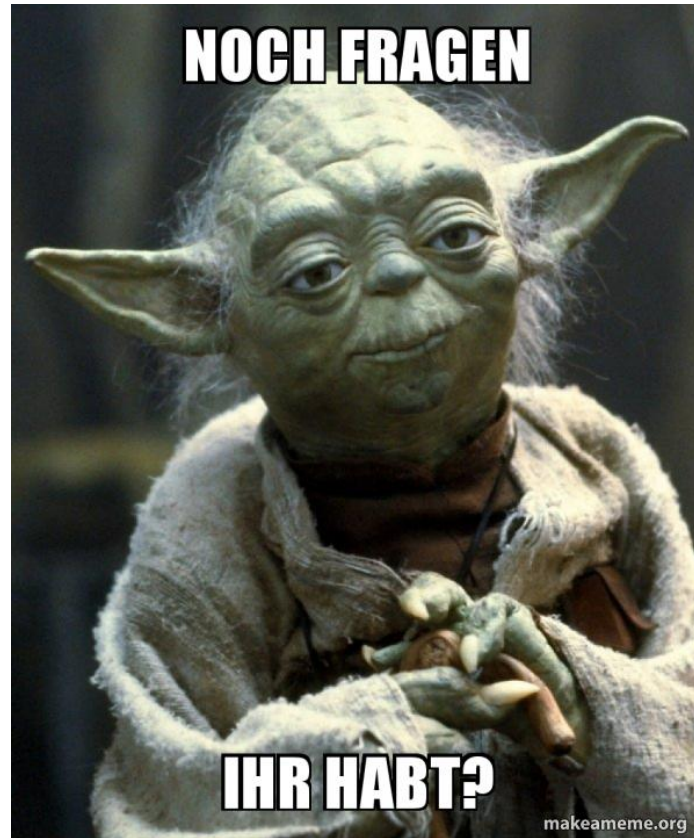

2. Iteration

Verfolgen von 3 Approaches

3. Iteration

Testing \Rightarrow Fast keine Testdaten (5 Fragen + Antworten)

Auswertung war dennoch einfach

Plan B

ATC Code	Medicine	Active Substance	Indication
V09I	Locametz	gozetotide	This medicinal product is for diagnosing specific membrane antigen (PSM).
N03AF04	Zebinix	eslicarbazepine acetate	Zebinix is indicated as adjunctive therapy in children aged above 6 years, with secondary generalisation.
L01FD04	Enhertu	trastuzumab deruxtecan	Breast cancer HER2-positive breast cancer: indicated for the treatment of advanced metastatic HER2-positive breast cancer.
L04AB04	Amgevita	adalimumab	Rheumatoid arthritis: Amgevita is indicated for the treatment of moderate to severe rheumatoid arthritis in adult patients when the disease is active.
C09DA07	MicardisPlus	Telmisartan;hydrochlorothiazide	Treatment of essential hypertension: (40 mg telmisartan / 12.5 mg hydrochlorothiazide) is indicated.
B02BX04	Nplate	romiplostim	Adults: Nplate is indicated for the treatment of thrombocytopenia (ITP) in adult patients receiving treatments (e.g. corticosteroids, intravenous immunoglobulin).
H02AB09	Efmody	hydrocortisone	Treatment of congenital adrenal hyperplasia in children 6 years and over and adults.
J07BC01	Hepilisav B	hepatitis B surface antigen	Hepilisav B is indicated for the active immunisation against hepatitis B virus (HBV) infection caused by all known strains of age and older. The use of Hepilisav B is contraindicated in persons with a history of hypersensitivity to any of the components.
			Rukobia, in combination with other antibiotics, for the treatment of complicated skin and soft tissue infections.

FileSearchAgent: Here are some drugs with similar indications to ELAHERE for treating ovarian, fallopian tube, or primary peritoneal cancers:

1. **Lynparza® (Olaparib)**

- **ATC Code:** L01XK01
- **Indication:** Maintenance therapy for BRCA-mutated high-grade serous ovarian cancer after platinum-based chemotherapy.

2. **Zejula® (Niraparib)**

- **ATC Code:** L01XK02
- **Indication:** Maintenance for high-grade serous ovarian cancer with BRCA mutation or homologous recombination deficiency after platinum-based chemotherapy.

3. **Rubraca® (Rucaparib)**

- **ATC Code:** L01XK03
- **Indication:** Maintenance therapy for BRCA mutation high-grade serous ovarian cancer after platinum-based chemotherapy.

4. **Oyavas® (Bevacizumab)**

- **ATC Code:** L01XC07
- **Indication:** Treatment of recurrent epithelial ovarian cancer in combination with chemotherapy, including platinum-resistant cases.

5. **Elahere® (Mirvetuximab Soravtansine)**

- **ATC Code:** L01FX26
- **Indication:** Monotherapy for folate receptor-alpha positive, platinum-resistant high-grade serous ovarian cancer.

These medications are indicated for similar types of ovarian cancer, specifically targeting certain genetic mutations or receptor expressions and are used after specific prior treatments.

ATC Code	Medicine	Active Substance	Indication
V09I	Locametz	gozetotide	This medicinal product is for diagnosing and monitoring of specific membrane antigen (PSM).
N03AF04	Zebinix	eslicarbazepine acetate	Zebinix is indicated as adjunctive therapy in children aged above 6 years, with secondary generalisation.
L01FD04	Enhertu	trastuzumab deruxtecan	Breast cancer HER2-positive breast cancer: indicated for the treatment of adult metastatic HER2-positive breast cancer.
L04AB04	Amgevita	adalimumab	Rheumatoid arthritis Amgevita is indicated for the treatment of moderate to severe rheumatoid arthritis in adult patients when the disease is not adequately controlled with conventional therapy.
C09DA07	MicardisPlus	Telmisartan;hydrochlorothiazide	Treatment of essential hypertension (40 mg telmisartan / 12.5 mg hydrochlorothiazide) is indicated.
B02BX04	Nplate	romiplostim	Adults: Nplate is indicated for the treatment of thrombocytopenia (ITP) in adult patients receiving treatments (e.g. corticosteroids, intravenous immunoglobulin).
